NIRUPAM CHAKMA

: Pu Speaker, ka lawm e. I think the Bill intends to give open licence to Gogas Company when we read that statement of

objects & reasons it is very clearly integrated that there are Gogas Companies operating in that and other parts of India which does not register under any act and provisions, The main question is whether we want to eliminate this company or whether we should give them permission to operate.

I think what we should consider is first of all not the interest of the depositor but whether we would allow this bogus company to enter Mizoram. That is primarily very important question. There is no provision in the bill to protect this company from entering Mizoram, we should make adequate provision for this. Let them face the Government scrutiny before operating within our state. So that Government can ensure whether this company is bogus or not. If the company is legally registered under any provision or Act or Rule. Still Government can insist either giving permission or registration in Mizoram.

Secondly regarding the assesment of property of this company Mr speaker, Sir, attachment of property of defaulting and financial establishment. Many companies will be coming here or may be establish within Mizoram. Espicially those companies will be coming to Mizoram and operating collecting many from the depositors. They may not deposite their money within Mizoram. They may not have any property within Mizoram How can the Government make an assesment of this. This is a very serious question. You cannot make an assesment of their money and property which are not available within Mizoram. That is why this provision of the company is operating within Mizoram they should deposite their money here. I think that will, that may, some how said that the depositor but. primary construct is whether the Government will allowed this bogus company in coming to Mizoram through .. seen or restrict them through this beu. Thank you sir.
